STANDATA interpretation 23-BCI-021

Building

Relocatable industrial accommodation labeling

Date Issued: October 2025

Purpose

To recognize new Part 10 units certified and labelled in accordance with CSA-A277 “Procedure for certification of prefabricated buildings, modules, and panels,” and clarify renovation and labelling procedures for existing Part 10 units.

Discussion

Under Sentence 2.5.1.1. (3) of Division C in the National Building Code – 2023 Alberta Edition (NBC(AE)), all relocatable industrial camp buildings constructed after May 01, 2024, must be certified by an organization approved by the Provincial Building Administrator.

Conformance to CSA-A277 is an acceptable solution for Part 10 buildings under Sentence 2.5.1.1.(2) of Division C. This certification confirms the building complies with the objectives and functional statements of the NBC(AE).

For existing units, Sentence 10.1.1.4.(2) of Division B requires that any renovations must be labelled appropriately. This interpretation provides a process for labeling renovated Part 10 units.

References

Article 10.1.1.4.

10.1.1.4. Renovation Requirement of Existing Units
1) Units built between 01 March 1977 and 01 May 2024 shall comply with the requirements of Part 10 of the Code in effect at the time of construction and to Sections 10.6. and 10.7. of this Code upon relocation.
2) A building referred to in Sentence (1) shall carry the appropriate Alberta label.

Division C, Article 2.5.1.1.

2.5.1. Factory-Built Assemblies
2.5.1.1. General
1) Where a component of a building is assembled off the building site in such a manner that it cannot be reviewed on site, off-site reviews shall be carried out to determine compliance with this Code.
2) Factory-constructed and other off-site-constructed buildings that are constructed after 01 May 2024 and certified in accordance with CSA A277, “Procedure for certification of prefabricated buildings, modules, and panels,” by an organization accredited for this purpose by the Standards Council of Canada are considered to comply with this Code.

3) Every relocatable industrial camp building that is constructed after 01 May 2024 shall be certified by an organization approved for this purpose by the Provincial Building Administrator, to confirm that the building complies with the objectives and functional statements of this Code.

Application

This interpretation applies to:

1. Any new building constructed in accordance with Part 10 of the NBC(AE) on or after May 01, 2024.
2. Labeling procedures for existing Part 10 units undergoing renovations.

Interpretation

1. New Part 10 relocatable industrial camp buildings or modules that carry the appropriate CSA-A277 certification label and specification sheet are considered compliant with the NBC(AE).

2. Renovations to certified structures in situ require applicable permits from the authority having jurisdiction (AHJ), as the structure is no longer under the original certification due to any modifications from the original construction. The constructor must request Green labels from Municipal Affairs. The labels will be provided to the AHJ for application during final inspection.

3. Currently, there is no program covering renovations to certified structures within the factory. Therefore, the Alberta green label program for renovations will be continued. Factories certified under CSA-A277 will be recognized for in-factory renovations.

Municipal Affairs has developed a standard form for use in applying for a building permit for renovations to Part 10 structures. This form is available as a fillable pdf document for download at:
